

Established audio system with special effects and presets

SOUND SYSTEM SOLUTIONS

SMALL MOSQUE

High-performance audio, low-key looks

Our dedicated installation loudspeakers are acoustically and aesthetically matched, so whatever combination of products you select, your system looks as good as it sounds – blending into the architecture while filling the room with superior quality audio.

Complete Solutions

We offer a complete portfolio of microphones for multiple positions and use, multichannel matrix mixing, multi zone amplification, mixing consoles with Mosque-specific effects engines and a wide range of loudspeakers. Our range includes everything from a basic ceiling speaker to a long throw horn loaded cabinet used in minarets for Adhan (call to prayer) and fiber glass coated line arrays used in courtyards. This allows us to create the most suitable solution for each project.

Flexible options suiting the most challenging acoustic environments

We offer a unique core audio system of our powered mixing console and mixing matrix to precisely address the highly reflective surfaces inside worship spaces. We deliver uncompromising audio performance so even a smaller mosque will sound warm and peaceful, supporting the voice of the Imam in the desired way.

A trusted partner

The legendary performance and reliability of our German made Powermate and CMS mixing consoles have made them the benchmark in mosque applications. We offer proven product solutions with up to 5 years warranty and the industry's best customer support.

SMALL MOSQUE

EXAMPLE FOR 300 M², 100 PEOPLE

System Overview

Full range loudspeakers to cover the 15 x 15 m main hall and the 5 x 15 m ladies prayer room. 100 V speakers to cover minarets for the call to prayer signal. Wired and wireless microphones connected to the powered mixer and the external amplifier complete the solution.

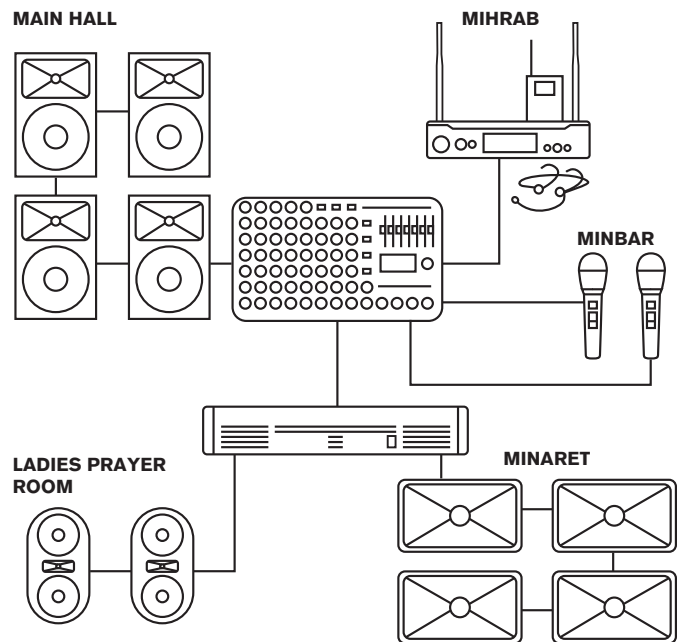

System Benefits

Limited cables and wires as the mixer has a powerful built in amplifier, an MP3 player and a PC interface

Always perfect sound with presets and effects which are specifically designed for Mosques' acoustic environment

Simplified installation and commissioning process due to the intuitive controls and multifunctional electronics

With just one powerful mixer/amplifier, and a small set of high output loudspeakers this is a very cost effective solution

MIXER, AMPLIFIER & MICROPHONES

1x PM 502 Powered mixer

1x PCL1225T 2-Channel amplifier

1x R300-E Wireless microphone

2x ND76S Wired microphone

LOUDSPEAKERS

4x ZX1i 2-Way loudspeaker for the main hall

2x EVID 4.2T 2-Way loudspeaker for the ladies prayer room

4x PA430T Horn speaker for the minarets

If you need it, we have it!

The EV loudspeaker families were especially developed for the different demands on technology and architecture that are found in mosques. The models of each series can be mixed and matched to achieve the best possible result for your installation. With our ND and R300 microphones as well as the CMS mixing consoles and MXE5 we provide additional high-quality components to meet all of your structural and acoustic requirements.
